INTRODUCTION

The *International Code of Nomenclature for algae, fungi, and plants* (hereafter “Code”, McNeill & al. in *Regnum Veg.* 154: 2012), in Provision 4 of its Division III, requires a preliminary guiding mail vote on proposals to amend the *Code*. All such proposals submitted to the XIX International Botanical Congress, to be held in Shenzhen, China, in July 2017, have been summarized and commented upon by the Rapporteur-général and Vice-rapporteur in the “Synopsis of proposals” (Turland & Wiersema in *Taxon* 66: 217–274. 2017, DOI 10.12705/661.36).

In all, 397 proposals to amend the *Code* have been submitted to the Shenzhen Congress, considerably more than for the Melbourne Congress of 2011 (338), slightly more than the Paris Congress of 1954 (387), and in fact the largest number at any Congress since the Stockholm Congress of 1950 (550). Of the 397 proposals, 220 were single authored, 97 had two authors, 63 had three or more authors, 4 came from the Nomenclature Committee on Fossils, and 13 came from Special Committees established by the Melbourne Congress (Wilson in *Taxon* 61: 878–879. 2012) to report to the Shenzhen Congress.

Ballot forms were distributed by the office of the International Association for Plant Taxonomy (IAPT), in Bratislava, Slovakia, via a download link on the IAPT website. The link was sent by e-mail in February 2017 by E.S. to 801 members of the IAPT, to the 55 authors for correspondence of proposals to amend the *Code* for distribution to all 158 authors, and to the secretaries of the seven Permanent Nomenclature Committees (see Div.III.2 of the *Code*) for distribution to all 98 Committee members. These are the three groups of individuals entitled to participate in the preliminary guiding mail vote according to Div.III.4(a) of the *Code*. There was considerable overlap between the groups. The deadline for receipt of completed ballots at the IAPT office was 31 May 2017. The IAPT office received a total of 82 completed ballots, all sent by e-mail. All were included in the vote count, which was carried out by M.K. and E.S. No ballots were returned anonymously, so none had to be disregarded.

RESULTS OF THE MAIL VOTE

Table 1 below gives the result of the preliminary guiding mail vote for each proposal, in the sequence “yes”, “no”, “ed.c.” (refer to the Editorial Committee), “sp.c.” (refer to a Special Committee), and

the total votes cast for that proposal (discounting abstentions), followed by “% no”, i.e., the percentage of “no” votes in the total votes. The proposals are sorted and numbered according to the “Synopsis of proposals”, with the running number of their original publication in *Taxon* (i.e., 001–397) also cited.

At previous Congresses, when the “no” vote was 75% or more, the Section decided that all such proposals would be ruled as rejected without discussion unless reintroduced from the floor. The Rapporteurs propose the same procedure for the Shenzhen Congress, where there are 87 such proposals (22% of the total). This is a higher percentage than the 15% ruled as rejected for the same reason at the Melbourne Congress.

An asterisk (*) preceding the number voting “ed.c.” indicates that the Rapporteurs, in their “Synopsis of proposals”, have suggested a special meaning for an “ed.c.” vote.

With 82 ballots submitted, the total number of votes on each proposal (“yes”, “no”, “ed.c.”, or “sp.c.”) shows the proportion of those who wished to express an opinion on that proposal. The lowest number of votes for any proposal was 60 and the highest was 78.

ACKNOWLEDGEMENTS

We thank Melanie Schori (United States Department of Agriculture), for checking an earlier draft of this report. We also thank the Natural History Museum, Department of Life Sciences, for funding S.K.’s travel to Berlin in June 2017 for a planning meeting with N.J.T.

Table 1. Results of the preliminary guiding mail vote on proposals to amend the *Code* submitted to the XIX International Botanical Congress. ed.c. = refer proposal to the Editorial Committee; sp.c. = refer proposal to a Special Committee; * = the Rapporteurs, in the “Synopsis of proposals”, suggested a special meaning for an “ed.c.” vote.
